INTRODUCTION

This is the Statewide Transportation Improvement Program (STIP) developed under the Transportation Equity Act for the 21st Century (TEA21) of 1998. The STIP shows how the funds will be used to accomplish our state's transportation needs for Fiscal Years 2002 through 2004.

The program was developed through coordinated efforts of the Montana Department of Transportation (MDT), state and federal agencies, local and tribal governments, metropolitan planning organizations, public agencies, transportation providers, citizens, and other interested parties. This program identifies highway, rail, aeronautic, and transit improvements to preserve, renovate, and enhance Montana's transportation system.

While the projects and dates shown are official departmental objectives, it is important to bear in mind that this program is only tentative. Execution of this program is contingent on a number of factors, including federal and state funding availability, right-of-way acquisition, utility relocations, environmental review, surveying, and design. Complications with one or more of these factors may cause a given project to be rescheduled.

We pledge to do our best to adhere to this program and to serve the public interest through these projects because we value their input, advice, and support of our efforts. The Department will continue to work toward providing better and safer transportation for Montana's citizens and everyone who travels through our state.

Incorporated by reference into the STIP are the Metropolitan Transportation Programs (MTIPs) from the Billings, Great Falls and Missoula metropolitan areas. MTIPs contain information about the transportation improvement projects that are currently underway or are slated to begin in three to five years. MTIPs are developed by Metropolitan Planning Organizations in cooperation with area transit providers, and state and local governments as part of a continuing, cooperative and comprehensive transportation planning process.

Questions on the contents of MTIP should be directed to the respective Metropolitan Planning Office responsible for drafting the document. Please contact the following individuals for more information:

In Billings:

Scott Walker, Transportation Planner
Yellowstone County Board of Planning
510 North Broadway
Billings, MT 59101

In Missoula:

Mark Landkammer, Transportation Planner
Missoula Office of Planning and Grants
435 Ryman
Missoula, MT 59802-4292

In Great Falls:

Benjamin M. Rangel, Senior Planner
Great Falls City-County Planning Board
P.O. Box 5021
Great Falls, MT 59403-5021

HIGHWAY PROGRAM

HIGHWAYS

The Statewide Transportation Improvement Program (STIP) project listing for highways is shown in this section for Fiscal Years 2002 through 2004. The Montana Transportation Commission is providing a concurrent review of this list, relying on public comments of the draft program that were presented in newspapers throughout the state and available in public libraries throughout the state.

The projects for the highway STIP were developed from District nominations. The project nominations were prioritized and ranked by surface condition, rideability, traffic safety, and geometrics. These priorities may have to be adjusted periodically to accommodate unforeseen needs that may arise through community involvement, special transportation studies, or emergencies.

This program was developed with the anticipated level of federal funds of \$270 million in FY2002. In addition to this is a \$38 million state match, a \$10 million state funded pavement preservation program, and an \$82 million maintenance budget. State funding is through a 27 cent per gallon gasoline tax. Federal funding is through the Transportation Equity Act for the 21st Century (TEA21). If changes in federal financing should occur then the highway Transportation Improvement Program will be modified accordingly.

The highway projects for 2002 through 2004 are presented by highway districts. The time of construction for all projects is subject to funding limitations.

FUNDS USE IN FISCAL YEAR 2002 BY IMPROVEMENT TYPE

Construction/Reconstruction

Highway construction is the complete rebuilding of a roadway on either existing or new alignment. Highway reconstruction includes all phases of design and construction of roadways on present alignments (may involve rebuilding or upgrading of existing facilities and minor alignment revisions). The estimated expenditure for this type of improvement for Fiscal Year 2002 is \$133.5 million.

Resurface/Resurface & Widen

Highway resurfacing is the addition of a pavement layer or layers over the existing roadway surface to provide additional structural capacity and improved serviceability. It includes all phases of design and construction of overlaying, recycling, and major widening of existing roadway. The estimated expenditure for these types of improvements for Fiscal Year 2002 is \$103.3 million.

Spot Improvement & Safety

Spot improvements include all phases of design and construction of lighting, signals, signing guardrail, fencing, intersection improvements, slope flattening, drainage or structural repair, and related small projects. Safety projects are designed to improve safety at hazardous locations throughout the Highway System. The estimated expenditure for these types of improvements for Fiscal Year 2002 is \$5.7 million.

Bridge Replacement/Rehabilitation

This improvement type includes all phases of design and construction of structures on or near existing alignments. It is different than reconstruction projects in that the length of the project is limited to replacing a deficient structure or structures. The estimated expenditure for Fiscal Year 2002 is \$38.5 Million.

Miscellaneous

The miscellaneous improvement type includes all phases of design and construction for any project that is not included in the above four categories. These may include, but are not limited to the following: environmental projects, enhancement projects, rest areas, lighting, historical monuments, scale sites, culvert and slide repair, and bicycle and pedestrian facility projects. The estimated expenditure for Fiscal Year 2002 is \$6.0 Million.

FUND USE IN FY2002 BY IMPROVEMENT TYPE

FUND USE INCLUDES CN AND CE

FUND USE IN FISCAL YEAR 2002 BY SYSTEM TYPE

IM - Interstate Maintenance

The Interstate Maintenance (IM) Program finances projects to rehabilitate, restore, resurface, and reconstruct the Interstate System. It is the third largest funding category under the Federal Aid Highway Program (FAHP); this shows the FAHP is focused on improving and preserving the Interstate System. It should be mentioned that reconstruction activities are not an eligible activity when adding capacity by constructing new lanes for single-occupancy vehicles. The federal share for this program is 91.24 percent and the estimated federal fund and state match expenditures for interstate projects in Fiscal Year 2002 are \$57.6 million (\$52.6 federal and \$5 state).

NH - National Highway

The National Highway System (NHS) program allocates a large amount of Federal resources to roads that are most important to interstate travel and national defense, roads that connect with other modes of transportation, and roads required for interstate commerce. The roads in which NH funds can be used for include the interstate and the principal arterial primary routes.

The NHS focuses on the highways of greatest national significance and by providing better access to the Interstate System for those parts of the state it does not directly serve. The Federal share for this program is 86.58 percent. The estimated federal funds and state match expenditures for National Highway projects in Fiscal year 2002 are \$81.3 million (\$74.2 million federal and \$7.1 million state).

STP - Surface Transportation Program

The STP is the largest of the Federal transportation funding programs. Funds in this program may be used to improve any road that is not functionally classified as a local or rural minor collector (may include NHS system). The exception to this is that bridge and safety projects financed under this program may be on any public road. These roads are now collectively referred to as Federal aid roads. They include the non-principal arterial primary routes and the old federal aid secondary and urban routes.

Besides the STP funding roads and bridges, the funds can also be used for bicycle facilities and pedestrian walkways, carpool and vanpool projects, safety improvements, landscaping and beautification and wetland mitigation.

STPP - Surface Transportation Program Primary.

The STP funds that remain after Urban (STPU), Secondary (STPS), and other (STPX) programs have been funded are available for the Primary System. The STPP funds are allocated to financial districts based on district ratios of mileage rated below adequate sufficiency and mileage rated at or below critical sufficiency in each district to that of

the entire state. MDT is responsible for selecting projects for the STPP program. All projects must be approved by the Transportation Commission. The federal share for this program is 86.58% with the State contributing 13.42% matching funds. The funds are primarily used to preserve, restore, or reconstruct roads and bridges on the state's primary (minor arterial) system.

STPS – Surface Transportation Program Secondary

The STPS is a sub-allocated portion of the larger Surface Transportation Program. House Bill 333 passed during the 56th legislative session modified the method of sub-allocating secondary road system funds. Rather than allocating funds to the counties, funds are now allocated to the State's five financial districts based on formula. Funds in this program may be used to improve any road that is not functionally classified as a local or rural minor collector and designated by the Montana Transportation Commission as a part of the state Secondary System. Each year, out of the federal aid funds available in the STP general program of funds, the Transportation Commission allocates a portion to the State Secondary System. The federal share for this program is 86.58% with the State contributing 13.42% matching funds. The funds are primarily used to preserve, restore, or reconstruct roads and bridges on the state secondary system. MDT and county commissions determine Secondary priorities cooperatively for each district.

STPU – Surface Transportation Program Urban

The STPU program is a sub-allocation of the larger Surface Transportation Program that provides financial resources to construct improvements on the designated urban highway system in Montana's 14 urban areas. This sub-allocation is authorized by state statute and approved annually by the Montana Transportation Commission. The allocation is based on a per capita distribution and is recalculated each decade following the census. The federal share for this program is 86.58% with the State contributing 13.42% matching funds. Programs and projects which funds are typically used for construction of new facilities include: reconstruction, resurfacing, restoration and rehabilitation of existing facilities; operational improvements; bicycle facilities, pedestrian walkways and carpool projects and programs. Priorities for the use of STPU funds are established at the local level through local planning processes with final approval by the Transportation Commission.

STPX – Surface Transportation Program for Other Routes (Off-system)

Other routes include the highways throughout the state that are not located on a defined highway system but are on the state maintenance system, and are not a minor collector or local road. STPX funds rarely exceed one-half million dollars. Projects on STPX routes are nominated yearly by the District Administrators from each of the five districts. All projects must be approved by the Transportation Commission. The federal share for this program is 86.58% with the State contributing 13.42% matching funds.

STPHS – Surface Transportation Program Hazard Elimination Program

The highway safety projects are determined by identifying high hazard locations and ranking these locations by their benefit/cost ratio. STPHS funds are distributed throughout the state for any public surface transportation facility or any publicly owned bicycle or pedestrian pathway or trail according to a prioritization of the projects' benefit/cost ratios and not by a financial district law. The federal share for this program is 90% with the State contributing 10% matching funds.

STPRP – Surface Transportation Program Rail/Highway Crossing: Protective Devices Program

Each year, approximately one-half of the funds are dedicated to installing new signals and the remainder is utilized to upgrade existing signals. Protective device projects are determined by inventorying railroad crossing and identifying hazardous sites. STPRP funds are distributed throughout the state based on high hazard sites and not by financial district law. The federal share for this program is 90% with the State contributing 10% matching funds.

STPRR – Surface Transportation Program Rail/Highway Crossing: Elimination of Hazard Program

Projects for this program are determined by identifying those sites where only grade separation will eliminate an identified hazard or where an existing grade separation exists but needs rehabilitation or replacement. STPRR funds are distributed throughout the state based on need and not by financial district law. STPRR funds are often used in combination with other federal funding sources (NHS, STPP, etc.) in order to accomplish a costly improvement. The federal share for this program is 90% with the State (or local) contributing 10% matching funds.

STPE – Surface Transportation Enhancement Program (also known as CTEP)

Annual funding for the Enhancement Program is ten percent of the STP funds plus five percent of the state's apportionment adjustment less that reserved for MDT use. Entities eligible for Enhancement funding include all 56 counties in Montana, all cities classified as First, Second or Third Class cities (49), and the seven Reservations. The total number of entities eligible for CTEP funding is 112.

The Enhancement funding for each entity is based on a per capita share. The per capita share is calculated by dividing the total Enhancement funds by the 2000 State population. The funding allocation for each municipality is calculated by multiplying its 2000 population by the per capita share. The funding allocation for each county is calculated by subtracting its 2000 municipal population(s) (those cities of the first, second and third class) from its total 2000 county population and multiplying this number by the per capita share. Funding allocations to the seven reservations are computed in the same manner.

Projects eligible for funding under the Enhancement program include facilities for pedestrians and bicycles; acquisition of scenic easement and scenic or historic sites; scenic or historic highway programs; landscaping and other scenic beautification; historic preservation; rehabilitation and operation of historic transportation buildings,

structures, or facilities including abandoned railway corridors including the conversion and use thereof for pedestrian or bicycle trails; control and removal of outdoor advertising; archaeological planning and research; and mitigation of water pollution due to highway runoff.

Any entity eligible for Enhancement funds can accumulate up to three years of funds to help pay for larger projects. The 13.42% matching share for Enhancement projects come from the local authority and not the State. Once the federally mandated ten percent has been taken out for both safety and enhancement programs, the remaining 80% is distributed to the urban, secondary, other, and primary systems, respectively.

The Federal share for this program is 86.58 percent. The estimated expenditures for the various STP-type projects for FY 2002 in Millions of dollars is:

FUNDING SOURCE	TOTAL	FED	STATE	LOCAL
Primary (STPP)	\$80.9	\$70.1	\$ 10.8	--
Secondary (STPS)	\$15.6	\$13.5	\$ 2.1	--
Urban (STPU)	\$ 4.8	\$ 4.2	\$ 0.6	--
Safety (STPHS)	\$ 3.9	\$ 3.4	\$ 0.5	--
Enhancements (STPE)	\$ 5.5	\$ 4.8	--	\$0.7
	\$110.7	\$96.0	\$14.0	\$0.7

CMAQ - Congestion Mitigation and Air Quality Improvement Program

Federal funds available under this program are used to finance transportation projects and programs to help meet the requirements of the Clean Air Act. States receiving minimum apportionments such as Montana can now direct a good portion of these funds to areas previously not eligible. MDT has taken advantage of this increased flexibility by developing the Montana Air & Congestion Initiative (MACI) program. The MACI program provides funding for projects and programs, which reduce transportation, related emissions in areas classified as non-attainment according to EPA's National Ambient Air Quality Standards (NAAQS) and also to areas deemed high-risk for becoming non-attainment.

Most measures that reduce vehicle emissions may be funded by documenting the projected air quality improvement. Projects that improve the efficiency of a transportation system or reduce vehicle use or travel would also be eligible for use of these funds.

The federal share for this program is 86.58 percent. The estimated federal fund and state match expenditure for CMAQ funded projects for Fiscal Year 2002 is \$2.0 million (\$1.7 million federal, \$0.3 million state).

BR - Bridge Replacement & Rehabilitation Program

This program is basically unchanged from previous years. Funds for the rehabilitation and replacement of deficient bridges are provided under this program. Concern over the large number of structurally and functionally deficient bridges in the country resulted in development of this program. A minimum of 15 percent of Bridge Program funds must be used on local roads, rural minor collectors or off-system. This percentage may be increased to 35 percent at the state's discretion. The state of Montana chooses to use 35 percent of the bridge program for off-system bridges.

The Federal share for this program is 80 percent. The estimated federal funds and state match expenditures for bridge projects for Fiscal Year 2001 is \$37.0 million (\$29.6 million federal and \$7.4 million state).

SFC - State Funded Construction (100% State Funded)

The State Funded Construction program is funded totally with state gas tax dollars. Projects not eligible for Federal aid are funded with these dollars. This program funds projects on the various highway systems to preserve the condition and extend the service life. Because of this program, the state is able to utilize a more favorable federal/state fund-matching ratio. The estimated expenditure for the SFC program of projects for State Fiscal Year 2002 is \$10 million.

FUND USE IN FISCAL YEAR 2002 BY SYSTEM TYPE

Performance Programming Providing Accountability to our Customers

This discussion about Montana Department of Transportation's Performance Programming Process (PPP) is being included in this year's STIP for the first time, because we would like to provide more information about how the Department selects projects. This process was first implemented in 2000 and will continue to be used and refined in the future.

Introduction

The **PPP provides a method for MDT to develop an optimal investment plan and measure progress** in achieving strategic transportation system goals. In other words, it's a tool to guide where we're going in the specific areas of pavement and bridge performance, and safety and congestion management. The PPP also provides a link to the Statewide Transportation Policy Plan and also provides annual incremental changes into long-range project development to avoid program disruption. The PPP also provides the following:

- Improved Accountability for MDT's transportation program.
- Clear guidelines for making sound and cost effective investment changes.
- Improved ability to measure progress in system performance and program delivery.
- Tangible justification of the Department's fiscal needs before Montana's Legislature.

Performance Programming uses the management systems of Pavement (PvMS), Congestion (CMS), Bridge (BMS), and Safety (SMS) to Develop a Funding Plan and support Capital Program development. A Funding Plan prescribes the amount of Pavement Preservation vs. Rehabilitation vs. Reconstruction available for pavement expenditures. To understand how PPP works, one needs to know what data the Management Systems analyze in judging system performance in order to achieve the best mix of funds:

PvMS – Ride Index measures pavement roughness. Pavement Roughness is the most important indicator of pavement performance because it directly affects the way in which pavements serve the traveling public. PvMS Ride Index is calculated from data collected in our Road Profile Survey.

Bridge– Currently, National Bridge Inventory (NBI) is used to gather data on substandard bridges as being Functionally Obsolete and/or Structurally Deficient. The prior term means the bridge is either too narrow to allow traffic to flow over it and/or too low to allow water to flow under it. Being Structurally Deficient means that some aspect(s) of the bridge – deck, piers, abutments – no longer carry traffic loads.

SMS – Safety management rating calculated by weighing crash rate, severity rate, severity index, and number of crashes. A return of \$3-\$6 million in accident cost savings for each \$1 million dollars invested in the construction safety program was found from analysis of before/after safety reviews of correctable crashes at improved sites. Accident cost savings include injuries, fatalities and property damage.

CMS – LOS In rural areas, Level of Service (LOS) is currently used, whereas Time of Delay (under development) will be used in urban areas. LOS uses a rating scale A through F where LOS A represents uninterrupted free-flow conditions and LOS F represents a gridlock condition. MDT's goal is to never let any highway drop below a LOS C and never below LOS B on the Interstate system.

In summary, Performance-based programming will allow MDT to 1) Make the best decisions for the investment of transportation funds, 2) Measure the progress in program delivery and system performance, 3) Justify fiscal needs of the Department, and 4) Provide accountability for the transportation program.

TRAFFIC SAFETY PROGRAM

TRAFFIC SAFETY BUREAU PROGRAM

On September 8, 1966, the Highway Safety Act of 1966 was enacted into law. Section 402 of that Act established a formula grant program to improve highway safety in the States. Conditions were attached by the Act and its rules to obtain a grant. Each state must have a highway safety program designed to reduce traffic accidents and deaths, injuries, and property damage. Further, states were to meet minimum requirements, one of which made the Governor responsible for the plan that was to be administered by a state agency with adequate powers and suitably equipped to conduct state and local programs.

Montana administers a Highway Safety Plan (HSP) that provides at least 40% of the funding to benefit local governments. Some ten-problem areas are addressed annually in the attempt to reduce traffic accidents and their consequences. Typically, these include countermeasures taken to eliminate alcohol's involvement in crashes, to protect drivers and occupants of motor vehicles, and to improve traffic records of state and local jurisdictions. Additional countermeasures include enhance police traffic services (particularly enforcement), support improvements in state and local emergency medical services, enhance motorcycle, bicycle, and pedestrian safety on the roadway, and improve federal and non-federal aided roadways throughout the state, and to plan and administer the program. Of all of the countermeasures applied in the problem areas to reduce crashes and consequences, those directed at improving federal and non-federally aided roadways offer the state and its local governments the opportunity to analyze a host of causes and to plan a variety of improvements to improve traffic safety.

A Safety Construction and Operation Improvement component is used annually to contract private traffic engineering services through local governments, or under limited circumstances, to be conducted by staff. Traffic accidents are analyzed and plans produced to improve the sites or segments of the studied roadway. This program area attempts to improve the roadway and environment by emphasizing the identification and surveillance of accident locations, evaluating highway design, construction, and maintenance, and conducting traffic-engineering services. Fund availability varies greatly each year. Effort is made to conduct at least two (2) to twenty (20) sites annually, depending on the availability of funds and staff time.

RECREATIONAL TRAILS PROGRAM

RECREATIONAL TRAILS PROGRAM

The Recreational Trails Program (RTP) was authorized in the Transportation Equity Act for the 21st Century (TEA-21) in 1998. The RTP is a Federal-aid assistance program to help the states provide and maintain recreational trails for both motorized and non-motorized recreational trail use. The program provides funds for all kinds of recreational trail uses, such as pedestrian uses (hiking, running, wheel chair use), bicycling, in line-skating, equestrian use, cross country skiing, snowmobiling, off-road motorcycling, all-terrain vehicle riding, four-wheel driving, or using other off-road motorized vehicles. Each state develops its own procedures to solicit projects from project sponsors, and to select projects for funding, in response to recreational trail needs within the state. The RTP encourages all kinds of trail enthusiasts to work together to provide a wide variety of recreational trail opportunities.

Fish, Wildlife & Parks (FWP) administers this program for Montana. A State Trails Advisory Committee advises the department on the administration and expenditure of funds allocated to the state. The committee is comprised of 16 trail users and 5 advisors representing government land managing agencies. FWP has relied on the State Comprehensive Outdoor Recreation Plan updated in 1993 for direction for the RTP program. A new State Trails Plan is now being developed for the program.

This program is funded through federal fiscal year 2003. Montana anticipates receiving approximately \$ 654,000 per year for trails for all Montanans! Applications can be obtained by contacting Bob Walker, FWP Trails Programs Coordinator, P.O. Box 200701, Helena, MT 59620-0701.

AERONAUTICS PROGRAM

AERONAUTICS

The Airport/Airways Bureau of the Aeronautics Division provides support to communities for planning, construction, engineering and maintenance and other airport improvements. The Bureau administers a loan and grant program, inspects every public use airport at least once every three years under the FAA 5010 program, operates and maintains airport UNICOMs and NDBs throughout the state, produces both an airport directory and aeronautical chart, and owns and operates 14 airports across the state.

The Bureau is responsible for maintaining and updating the State Aviation System Plan (SASP). The SASP is a year to year program that is paid 90% by the FAA and is intended to form a working plan for aviation throughout Montana. A base SASP is completed about every 10 years and every year in between updates to the plan are completed. The base plan serves as a guide for airport/airway development statewide by taking current inventories of all aviation related items throughout the state and forecasting those items over a 20 year period. Updates to the plan might include airport standards reviews, pavement condition indexes, airport land use compatibility studies, capital improvement plans and other applicable topics. The capital improvement plans (CIPs) created under the auspices of the SASP provide the framework for planning future improvements over a 5 year period to the airport infrastructure in Montana. Each airport submits their 5 years improvement goals to the plan and when the compilations are complete the CIPs serve as an important planning tool for both the FAA and the Aeronautics Division for allocation of both state and federal funds.

Beginning in mid-1993, an airport loan and grant program was established for the promotion of aeronautical purposes. The program is designed to be a flexible funding mechanism to assist eligible airport sponsors. Airport development grants and loans are available to public use airports. Maximum grant can be up to 50% of the sponsor share of project cost. Maximum loans can be up to 100% of sponsor share of cost. Under the Airport/Airway Bureau administered loan and grant program, the bureau works closely with the FAA in determining which airport projects require funding assistance and when. Because of this coordination with the FAA, the state can provide additional financial assistance to airport sponsors to help leverage federal funds. Airports that receive federal airport improvement program (AIP) funding are required to pay 10% of the total project costs with the FAA providing the remaining 90%. If the airport sponsors can secure a grant from the Aeronautics Division, they can use that grant to pay half the sponsors required share. The remaining 5% owed by the sponsor for the project may be able to be paid by obtaining a low interest loan from the Aeronautics Division. The funding for the Aeronautics loan and grant program is provided by a 2 cent per gallon general aviation fuel tax from which military aviation and the airlines that operate within the state are exempt. Also available through the Aeronautics loan and grant program is a preliminary engineering grant (PEG). The PEG grant is a \$1,000 grant given to airport sponsors in order to aid in the assessment of possible future airport projects. The PEG grant is given with minimal effort and is intended to act as a primer for sponsor projects. All Aeronautics loan and grants applications are ranked and prioritized. The Montana Aeronautics Board must then meet once a year to approve or deny loan and grant applications. The following projects are planned by the sponsor to be accomplished in the applicable year.

2002 GENERAL AVIATION PROJECTS

COUNTY	LOCATION	SCOPE OF WORK	COST
Deer Lodge	Anaconda	Bridge replacement	\$37,500
McCone	Circle	Construct parallel taxiway and install a deer fence	\$237,967
Glacier	Cutbank	Terminal rehabilitation	\$100,000
Powell	Deer Lodge	Purchase 224.3 acres of land for runway extension	\$336,450
Valley	Glasgow	Enlarge and strengthen tie-down area; construct turnaround on runway 25 end	\$449,188
Lewis and Clark	Lincoln	Add runway extension; acquire 20 acres of land; construct hangar taxilane; rehabilitate runway	\$567,598
Lake	Ronan	Construct runway extension; construct runway 16 paved overrun area; put on 2" overlay on runway 16/34	\$706,145
Musselshell	Roundup	Rehabilitate East 1/3 of runway 06/24	\$171,449
Mineral	Superior	Extend runway; relocate power line	\$1,130,735

RAIL PROGRAM

FEDERAL PROJECT AND PLANNING ASSISTANCE

Montana's source of funding for rail freight projects is through the Railroad Revitalization and Regulatory Reform Act of 1976 (4R Act) and its amendments. The Act contains the Local Rail Freight Assistance (LRFA) Program which provides federal funding for rail planning and rail service assistance projects. A project must be documented in a current state rail plan to be eligible for federal funding. The federal share of approved projects for acquisition and construction is 50% and the federal share for rehabilitation projects is 70% of total project costs. The balance is provided by the user and/or railroad.

Each eligible state is allocated statutory entitlement funds on an annual basis which can be used for planning purposes or for projects, and can compete for discretionary project funds. However, since 1996, Congress has **not** authorized funding for the LRFA Program and there appears to be little support for continuing this federal program.

MDT has a revolving loan program which uses repaid LRFA funds. This program provides funding for rail freight projects if they are eligible under the LRFA Program requirements.

Federal Railroad Administration
 Potential Local Rail Freight Assistance (LRFA) Projects
 For Federal Fiscal Years 2002 & 2003
 October 1, 2001 - September 30, 2003

County	Location	Type of Work	Federal Dollars Est. Cost	Local Dollars Est. Cost	Total Est. Cost

County	Location	Type of Work	Federal Dollars Est. Cost	Local Dollars Est. Cost	Total Est. Cost
Toole	South Industrial Park - Shelby	Construct spur line to access warehouse in South Industrial Park.	\$65,730	\$28,170	\$93,900

PUBLIC TRANSPORTATION PROGRAM

PUBLIC TRANSPORTATION

General

The Montana Department of Transportation (MDT) acts as facilitator of public transportation services. It does not directly provide the services.

The MDT disseminates information on U.S. Department of Transportation programs and provides technical services to applicants in preparing funding proposals.

The MDT has participated in the preparation of local transit development plans for non-metropolitan areas of the state. Local governments and non-profit entities are responsible for the development and operation of local transit systems.

Private enterprise is encouraged to participate in providing public transportation. Eligible grantees may contract for services from, or lease vehicles to, private operators.

FEDERAL TRANSIT ACT

Public Mass Transportation (Section 5307 Program)

The Section 5307 grant provides public mass transportation for cities with populations of over 50,000. Federal funds pay 80 percent of capital and planning projects and 50 percent of deficit operating costs. The remaining match of 20 percent and 50 percent respectively, must come from non-federal funds or from non-farebox revenue. The designated recipient of Section 5307 funds is the Governor who in turn can designate the funds to a public body. In Montana the Governor has designated Missoula, Great Falls, and Billings as the recipients of Section 5307 funds.

Capital Assistance for Elderly and Persons with Disabilities (Section 5310 Program)

Authorizes capital grants to eligible organizations to assist in providing transportation for the elderly and/or persons with disabilities. Federal Transit Administration (FTA) funds 80 percent of all costs for equipment, with 20 percent match provided by the local recipient. Eligible recipients for this program are private, nonprofit organizations; public bodies approved by the State to coordinate services for elderly persons and persons with disabilities; or public bodies which certify to the Governor that no nonprofit organization is readily available in a service area to provide this transportation service.

Financial Assistance for Rural Areas (Section 5311 Program)

This program enhances the access of people in non-urbanized areas by providing public transportation. Federal funds pay 80 percent of capital costs and 50 percent of deficit operating costs. The remaining 20 percent and 50 percent respectively must come from the local recipient. Eligible recipients of these funds can be a state agency, a local public body, a nonprofit agency, or an operator of public transportation services. Fifteen percent of the state's Section 5311 apportionment is dedicated to carry out a program to develop and support intercity bus transportation.

Metropolitan Planning/State Planning and Research Programs (Sections 5303/5313 Programs)

These are the principal sources of federal financial assistance for the development and improvement of comprehensive public mass transportation systems. The eligible recipient of Section 5303/5313 funds is the State of Montana.

FEDERAL LANDS HIGHWAYS PROGRAM

FEDERAL LANDS HIGHWAY PROGRAM

GENERAL

The Federal Lands Highway Program (FLHP) is composed of four categories: Public Lands Highway - Discretionary, Park Roads and Parkways, Indian Reservation Roads, and Forest Highways. Funding for this program generally is allocated on the basis of relative need. Following is a brief description of each category followed by the project listing for Federal Fiscal Years 2002-2004.

PUBLIC LANDS HIGHWAY (PLH) - DISCRETIONARY

The Public Lands category provides funds for any public road providing access to and within Federal lands. The project selection is discretionary; projects are selected by the FHWA Administrator within available funding. Montana projects compete nationwide so there is no guarantee that Montana will receive any PLH funds.

PARK ROADS & PARKWAYS (PR)

The Park Roads and Parkways category is designed to provide assistance for park roads that are owned by the National Park Service (NPS) and that provide access to and within the NPS.

INDIAN RESERVATION ROADS (IRR)

The Indian Reservation Roads (IRR) category consists of public roads owned by the Bureau of Indian Affairs (BIA) and State/Local roads that provide access to and within Indian lands.

FOREST HIGHWAYS (FH)

The Forest Highways category is designed to provide assistance for public roads that provide access to and within the National Forest System.

REFUGE ROADS (RR)

Refuge Roads is a new category providing funding that may be used by the U.S. Fish and Wildlife Service(FWS) and the FHWA for maintenance and improvement of public roads that provide access to or within a unit of the National Wildlife Refuge System and for which title and maintenance is vested in the U.S. Government.

FLHP funding can be used for road planning, research, engineering, and construction; transportation planning for travel and tourism; and parking areas, acquisition of scenic easements and historic sites. FLHP projects are 100 percent Federal share. Funds for FLHP are available for any kind of transportation project that is adjacent to or provides access to areas served by a particular class of FLHP funds.

PUBLIC LANDS HIGHWAY- DISCRETIONARY

S-419 - DEAN TO NYE -- Phase II

MTS-419 RP 16.6 to 20.7 4.114 MILES

Scope: Reconstruction

PHASE	COST ESTIMATE	FUNDING SOURCE
PRELIMINARY ENGINEERING, ENVIRONMENTAL ANALYSIS, GEOTECHNICAL, AND DESIGN	\$675,000	FHWA
Right-of-Way Acquisition	\$70,310	Stillwater County
Utilities	\$150,000	PLH (previous) and Stillwater County
Construction	\$3,206,500	PLH Discretionary
Construction Engineering	\$384,780	PLH Discretionary
Contract Administration	\$32,065	PLH Discretionary
PUBLIC LANDS HIGHWAY DISCRETIONARY FUNDS	\$3,623,345	
TOTAL PROJECT COST	\$4,518,655	

U 5221 - GIANT SPRINGS ROAD-GREAT FALLS Phase II

Urban Route 5221 RP 0.489 to 0.99 0.5 MILES

Scope: Reconstruction and Bike/Ped

PHASE	COST ESTIMATE	FUNDING SOURCE
PRELIMINARY ENGINEERING, ENVIRONMENTAL ANALYSIS, GEOTECHNICAL, AND DESIGN	\$170,000	Great Falls
Right-of-Way Acquisition	\$0	Lands Swap between Great Falls and FW&P
Utilities	\$0	---
Construction	\$1,630,000	PLH Discretionary
Construction Engineering	\$244,500	PLH Discretionary
Contract Administration	\$16,000	PLH
PUBLIC LANDS HIGHWAY DISCRETIONARY FUNDS	\$1,200,000	
TOTAL PROJECT COST	\$2,060,800	

S-418 PRYOR ROAD – Phase II

MTS-418 MP 8.39 to 15.9 7.51 MILES

Scope: Reconstruction

PHASE	COST ESTIMATE	FUNDING SOURCE
PRELIMINARY ENGINEERING, ENVIRONMENTAL ANALYSIS, GEOTECHNICAL, AND DESIGN	\$230,000	IRR Funds
Right-of-Way Acquisition	\$250,000	IRR Funds
Utilities	\$300,000	IRR Funds
Construction	\$13,600,000	IRR (50%), STPS (25%), PLH
Construction Engineering	\$1,360,000	IRR (50%), STPS (25%), PLH
Contract Administration	\$136,000	IRR (50%), STPS (25%), PLH
PUBLIC LANDS HIGHWAY DISCRETIONARY FUNDS	\$4,000,000	
TOTAL PROJECT COST	\$15,876,000	

S-236 - CLAGGETT HILL

MTS-236 RP 44.1 to 47.9 3.8 MILES

Scope: Reconstruction on New Alignment

PHASE	COST ESTIMATE	FUNDING SOURCE
PRELIMINARY ENGINEERING, ENVIRONMENTAL ANALYSIS, GEOTECHNICAL, AND DESIGN	\$285,000	Secondary Road Funds
Right-of-Way Acquisition	\$20,000	Secondary Road Funds
Utilities	\$0	---
Construction	\$2,750,000	PLH
Construction Engineering	\$275,000	PLH
Contract Administration	\$27,500	PLH
PUBLIC LANDS HIGHWAY DISCRETIONARY FUNDS	\$3,052,500	
TOTAL PROJECT COST	\$3,357,000	

S-323 -- ALBION -- NORTH AND SOUTH

MTS-323 RP 52 to 62 10.0 MILES

Scope: Reconstruction to Gravel Surface

PHASE	COST ESTIMATE	FUNDING SOURCE
PRELIMINARY ENGINEERING, ENVIRONMENTAL ANALYSIS, GEOTECHNICAL, AND DESIGN	\$655,414	PLH (previous) and Secondary Road Funds
Right-of-Way Acquisition	\$21,000	PLH (previous) and Secondary Road Funds
Utilities	\$175,000	PLH (previous) and Secondary Road Funds
Construction	\$3,731,060	PLH
Construction Engineering	\$373,106	PLH
Contract Administration	\$37,310	PLH

PUBLIC LANDS HIGHWAY DISCRETIONARY FUNDS \$4,141,476
TOTAL PROJECT COST \$4,992,890

TRANSPORTATION IMPROVEMENT PROGRAM
FEDERAL LANDS HIGHWAY PROGRAM, 23 U.S.C 204
STATE: MONTANA**

FEDERAL FISCAL YEAR 2002

County: BEAVERHEAD

Route: FH-73

Project Name: PIONEER MOUNTAIN SCENIC BYWAY, PFH 73-1(5)

Limits/Termini: MP 11.9 TO 16.6

Type of Project: RECONST.

Program Funding for Construction (\$000): 4,500

Contracting Agency: FHWA/WFLHD

Letting Date: 5/02

Total of Preliminary and Construction Engineering for all projects (\$000): 2,700

Program Funds Available (\$000): 10,600

FEDERAL FISCAL YEAR 2003

County: MINERAL COUNTY

Route: FH-84

Project Name: LITTLE JOE ROAD, PFH 84-1

Limits/Termini: MP 0.0 TO 1.9

Project: OVERLAY

Program Funding for Construction (\$000): 500

Contracting Agency: FHWA/WFLHD

Letting Date: 3/03

County: MINERAL COUNTY

Route: FH-84

Project Name: LITTLE JOE ROAD, PFH 84-1

Limits/Termini: MP 1.9 TO 16.1

Project: RECONSTRUCTION

Program Funding for Construction (\$000): 8,800

Contracting Agency: FHWA/WFLHD

Letting Date: 3/03

Total of Preliminary and Construction Engineering for all projects (\$000): 2,700
Program Funds Available (\$000): 10,600

FEDERAL FISCAL YEAR 2004

County: RAVALLI

Route: FH-66

Project Name: WEST FORK BITTERROOT, PFH 66-14)

Limits/Terminal: MP 14.5

Project: BRIDGE REPLACEMENT

Program Funding for Construction (\$000): 4,000

Contracting Agency: FHWA/WFLHD

Letting Date: 3/03

Total of Preliminary and Construction Engineering for all projects (\$000): 2,700
Program Funds Available (\$000): 10,600
